EXECUTIVE SUMMARY

This document outlines the professional architectural and UI/UX fixes implemented for the `checkias.com` platform. Following our successful branding and security audit, this report serves to document the resolved issues and system optimizations.

SECURITY ENHANCEMENTS

OTP Anti-Spam Mechanism

Implemented a **30-second cooldown timer** for the "Resend OTP" functionality.

- **Affected Pages**: *Register, Forgot Password, Admin Forgot Password*.
- **Implementation**: The resend button is disabled during the countdown to prevent API spamming and ensure system stability.

Onboarding Data Privacy

Updated the contact information placeholders in the user onboarding process to prevent accidental data entry of sample values.

- Replaced the valid sample phone number placeholder with a generic invalid format: +91 00000 00000.

BRANDING & UI UPDATES

Navigation Improvements

- **Navbar Styling**: Renamed "Live Now" to **"Home"** to create a more standard and intuitive navigation flow.
- **Animation Removal**: Deprecated the pulse animation on the Home link to maintain a clean, high-end professional aesthetic.

Footer & Contact Information

The footer has been restructured to prioritize Telegram as a primary communication channel.

- **Social Media Reordering**: Adjusted the icon order to **Telegram, YouTube, and Instagram**.
- **Link Validation**: Integrated the official Telegram URL (t.me/Check_IAS).
- **Contact Section**: Added a dedicated Telegram contact option positioned **before** the Email contact for faster user accessibility.

Admin Dashboard Branding

- **Email Configuration**: Replaced valid administrative email samples with professional system placeholders (`admin@checkias.com`) in the Admin Forgot Password and Settings modules.

TECHNICAL FIXES

Favicon & Logo Optimization

- Resolved favicon visibility issues in Google Search results by implementing square-cropped, high-resolution icons.
- Integrated theme-aware logos across the platform to ensure perfect contrast in both Light and Dark modes.
